S.2 Biology task

14th/08/2023

Scenario

Recently visitors from abroad called Farmers Without Borders visited your village. They toured around the village and went up to your local primary school farm. They came along destroyed boxes in the school farm. One of them called Sophi asked the deputy headteacher of the school, what the boxes were for. The deputy head teacher replied that they used to rare bees there but they no longer did. Sophi was excited about raring bees; she said bees are very necessary organisms in nature. After the tour around the school, a village meeting was called, Miss Sophi talked at the meeting and said that she is ready to fund a project of renovating the boxes where bees used to stay in the village school farm as long as a project proposal is written.

Task

As a biologist in your village, in not more than 600 words, write out a proposal you would present for the offer of this project.

END

Fruitful holidays
